User Acceptance Testing (UAT) Template

Date	20-10-2026
Team ID	Not provided
Project Name	iMovies - Movie Ticket Booking
Maximum Marks	

Project Overview:

Project Name: iMovies - Movie Ticket Booking

Description: A web application for browsing movies, selecting a show date and time, choosing seats, confirming bookings, and viewing personal booking history.

Project Version:v1.0.0

Testing Period: 2026-10-20 (local workflow verification)

Testing Scope:

- User registration and login
- Freelancer and client profile creation
- Job posting and job application
- Messaging system
- Payment gateway integration
- Job status updates (e.g., applied, hired, completed)
- Search and filter functionalities
- Review and rating system

Requirements to be Tested:

- As a freelancer, I want to apply for jobs easily.
- As a client, I want to post jobs and hire freelancers.
- As a user, I want secure login and payments.
- As an admin, I want to manage reported users and disputes.

Testing Environment:

Testing Environment

- **URL: https://iMovies - Movie Ticket Booking.example.com**https://freelancefinder.example.com
- **Credentials**:
  - **Freelancer**: test.freelancer@example.com / password123
  - **Client**: test.client@example.com / password123
  - **Admin**: admin@example.com / adminpass

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User registration/login	1. Register a user or log in with an existing account.	User can authenticate successfully.	Passed in local workflow test.	PASS
TC-002	Browse and filter movies	1. Open homepage. 2. Browse/search/filter movies. 3. Select a movie.	Movie catalogue is visible and a movie can be selected.	Passed in local workflow test.	PASS
TC-003	Select date/showtime/seats	1. Select a movie. 2. Choose date and showtime. 3. Select seats.	The user can choose a show and seats.	Passed in local workflow test.	PASS
TC-004	Confirm booking	1. Complete selections. 2. Confirm booking.	Booking is saved and confirmation is shown.	Booking confirmed successfully in local workflow test.	PASS
TC-005	My Bookings	1. Open My Bookings after booking.	The signed-in user sees their booking details.	Booking appeared in My Bookings.	PASS
TC-006	Booking persistence	1. Log out. 2. Log back in. 3. Open My Bookings.	Previously saved booking remains visible for the same user.	Booking remained visible after logging out and back in.	PASS
TC-007	Prevent rebooking occupied seats	1. Attempt to select the same seats for the same show again.	Previously booked seats are unavailable.	The same seats were unavailable for the same show.	PASS

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No defects reported during the seven workflow checks performed.	N/A — no bug reproduced during the completed workflow tests.	N/A	No known open bug from these tests	Continue testing negative cases and production deployment behaviour.

Sign-off:

Tester Name: Nainsi Patidar

Date: 26-05-2025

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.

Testing Scope — iMovies

Authentication; movie browsing and filtering; date/showtime and seat selection; booking confirmation; My Bookings; booking persistence across logout/login; and occupied-seat availability checks. Tests were performed in the local development environment.

Limitations: this UAT does not verify a production deployment, real payment processing, cancellation/refunds, load handling, or race-safe simultaneous bookings.
